CS418 Milestone 1 Grade Sheet

student: _____

Base Requirements

___/2 The web site must provide a web page that allows a registered user to submit a question to the website. This user is the ASKER in the below requirements.

___/1 Users must be able to log into your web site using the credentials supplied. There is no need to implement new user registration.

___/1 The user login process must use the HTTP POST method.

___/1 Questions shall be stored in a MySQL database with a reference to the ASKER. Answers corresponding to questions shall be stored in the database as well.

___/1 The question submission interface must minimally consist of a "title" text field and a "content" text field and use HTML forms.

___/1 For each question, allow other registered users to submit answers to the questions (potentially multiple answers per user per question).

___/1 Other answers to a question must be displayed along with the associated question.

___/2 The ASKER shall have the ability to mark the answer they feel answers their question best. See StackOverflow's checkmark on answers as an example of this.

___/2 The question display interface must minimally consist of the question contents, associated answers, the author of the question/answers, and an indicator of the answer marked by the ASKER.

___/2 The home page for your web site must provide links to the questions previously asked, minimally including the question title.

___/1 No corrections needed to codebase come demo day.

Brief Project Writeup

___/3 Submitted on demo day - How is each requirement met, design decisions, programming tricks, helpful resources consulted

Website Usability

___/3 How easy is the site to use

Website Aesthetics

___/2 How nice does the site look

Midway Status Report

___/2 3-4 min presentation on assignment progress

MILESTONE 1 GRADE: ___/25
